STAR BRITE® / KINPAK, INC.

Star brite® was founded in 1973 based on a line of automotive maintenance items. The company's key product was an innovative car polish formulated with special cleaners. It quickly and easily restored dull, oxidized paint, using space-age polymers to provide a beautiful shine and extremely long-lasting protection. The company soon thereafter expanded the product line to include marine and RV products.

In the late 1970s Star brite® expanded its market base by opening a distribution center near Toronto, Canada, an office in Lyon, France, and a warehouse facility in Rotterdam, The Netherlands. The company issued an IPO in the mid-1980s as Ocean Bio-Chem, Incorporated (OBCI). Star brite® products are now sold in virtually every developed country in the world and the firm is the leader in its various fields.

Today, Star brite® continues to bring new and innovative products to specific markets. The company currently markets specialty products to the marine, automotive, power sports, outdoor power equipment, RV, trucking, home care and aviation industries. In addition to its chemical product offerings, the company also

manufactures a complete line of brushes, handles, related cleaning aids, tie-downs and bungees. Star brite's main manufacturing and distribution facility is Kinpak, Inc., in Montgomery, Alabama. Kinpak also manufactures numerous items under a private label program for major oil companies and consumer goods retailers.

The facility consists of a 300,000 s.f. manufacturing, blending, packing, and distribution center utilizing RF technology. The plant has a 475,000 gallon tank farm, an on-site laboratory, quality control center, four blow-molding machines for PVC and HDPE bottles and eight fully-automated high-speed filling lines. Kinpak also has a five-acre marine terminal on the Alabama River for accepting shipments of raw materials by barge and rail.

Star brite® products are available at most marine retailers, sporting goods locations, farm stores, discount chains, automotive and RV stores worldwide.

One of the first 4 stroke oils to be certified under NMMA's new FC-W category. Meets or exceeds all criteria for viscosity, filter plugging, foaming and aeration. Successfully passed NMMA's 100-hour general performance engine test.

- Exceeds OEM requirements – will not void engine warranty
- Surpasses API requirements for SJ, CF-4 and CH-4
- Premium, synthetic blend engine oil designed for 4 stroke high-performance outboards, gasoline inboards and stern drives
- Additive package optimizes engine cleanliness, prevents sludge build up
- Shear-stable polymer additives plus synthetic base stocks maintain proper viscosity under extremely harsh marine conditions
- Synthetic/organic blend assures excellent low-temperature properties for quicker starts
- Provides maximum protection in severe, high rpm applications
- Marine engines typically operate at higher rpms than automotive engines, requiring an oil that is specifically designed and formulated to provide protection under these higher temperature, higher stress circumstances
- Marine engines have vertical crankshafts versus horizontal crankshafts in automotive engines. As a result, while an automotive engine's crankshaft is continuously bathed in oil, the marine engine's crankshaft is not, so it needs an entirely different oil formula for maximum protection
- Marine engines are often operated in harsh, saltwater environments that are much more demanding than the conditions faced by most automotive engines. Accordingly, their engine oil must be up to the task

STAR★COOL® HIGH PERFORMANCE SYNTHETIC ENGINE COOLANT

Star brite® worked with the world's leading formulators of coolant additives to develop a product that significantly outperforms traditional coolants and helps engines develop maximum horsepower. Star Cool® combines an essentially non-toxic propylene glycol base with unique poly organic additives (POAT) to create the most technologically advanced engine coolant.

Star Cool® is the best choice for all high-performance engines. With a service life of up to 2+ years, 250,000 miles or 4,000 hours in gasoline engines (750,000 miles, 7+ years or 12,500 hours in diesel engines) it goes significantly beyond all OEM specifications. Star Cool® passivates metal surfaces to create a barrier to corrosion and will seal pinhole leaks or small cracks. Pre-mixed with de-ionized water, it is ready to use and safe for all water-cooled gas or diesel-powered engines. Star Cool® is ideal for year-round use; protecting against boilover to 265°F and freezing to -26°F (with 15 psi cap).
